

## ONLINE TRAINING OPTIONS

Online training programs are offered on an annual subscription basis. These programs can be purchased individually or as a package. **Unlimited employees** can be trained through these programs.

### QuickData© - Client Portal – FREE FOR CLIENTS

Good governance and compliance are essential to the success of meeting obligations under AS3745-2010 / AS4083-2010 - Planning for Emergencies in Facilities.

The risk of being unable to determine your organisation's compliance can be costly and/or time-consuming. We have developed an online Compliance Management and Reporting Portal, which provides accurate compliance information for your reporting purposes, while measuring and reporting our service level KPIs.

As a **QuickFire EM** client, we ensure your certifications, training documents and plans are readily accessible, via the online portal. **QuickData©** user-friendly dashboards provide an instant 'health check' of your site/organisation portfolio, immediately highlighting key elements of your site's compliance status.

### QuickInduct© - Induction

**QuickInduct©** is a site-specific online training program designed specifically to provide immediate compliance (Fire & Emergency Response) for **NEW** Wardens commencing employment with your organisation – prior to undertaking face to face training. **QuickInduct©** is a user-friendly program providing site specific information for new employees tailored to specific levels listed in the Emergency Management Plan.

### QuickRefresh© - Skills Refresher

**QuickRefresh©** is a site-specific online training program designed specifically to capture existing employees who are unable to attend the annual face to face emergency response training. Upon completion this program will ensure compliance for a period of 12 months for each participant. **QuickRefresh©** can be accessed by an individual participant only once every 24 months.

### QuickRetention© - Skills Retention

**QuickRetention©** is a site-specific online training program designed specifically for existing employees to access, at any time, allowing them to undertake skills retention activities which will compliment and maintain their emergency response knowledge. **QuickRetention©** is a module-based system which includes all relevant information required to facilitate the roles of the warden group and include video learning packages along with scenario-based emergency response incidents to test Wardens on all emergency types.

### QuickHomeCare© - Home Care

**QuickHomeCare©** is a generic online training program designed specifically for Home Care employees (those working in the community). This training program is designed specifically around the different work environments Home Care employees are exposed to - safety, awareness of hazards and procedures in a private residence. Upon completion of this program a Participant will be linked to the compliance table in the **QuickData©** Client Portal, ensuring that Home Care employees maintain their annual training compliance requirements.
